Summary

Full-Stack Developer with experience building production applications across healthcare, multi-tenant platforms, and developer tools using TypeScript, React, Node.js, Python, and PostgreSQL. Experienced in backend engineering, clinical workflows, voice automation, API development, and distributed systems.

Skills Summary

- **Languages**: TypeScript, JavaScript, Python, SQL
- **Frontend**: React.js, Next.js, Vite, Tailwind CSS
- **Backend**: Node.js, Express.js, Django, FastAPI, REST APIs, WebSockets, SSE
- **Databases**: PostgreSQL, MongoDB, Redis, Prisma, Drizzle ORM, Sequelize, pgvector
- **Cloud & DevOps**: AWS (EC2, S3, Lambda, CloudFront), Docker, Vercel, GitHub Actions
- **Tools**: Git, Linux

Experience

AstraScribe Remote
Full Stack Developer **Sep 2026 – Present**

- Contributed to a multi-tenant EMR platform for outpatient clinics, building clinical workflows across React, TypeScript, and backend services.
- Implemented V1 consultation workflows and the phone voice-agent flow, supporting automated patient interactions in Hindi, English, and Gujarati.
- Built V2 consultation, clinical notes, and forms functionality, including synchronization that preserves clinician-entered answers.
- Implemented V2 outside-pharmacy prescription fulfillment, including partial prescription selection and PDF generation for selected items.

SleekSky Technologies Pvt. Ltd. Remote
Web Developer (Intern → Independent Contractor) **Jan 2026 – Present**

- Developed backend services for NudgePlay, a multi-tenant game-creation platform supporting web, mobile, and desktop publishing workflows.
- Built 20+ REST APIs using Node.js and Express, integrating PostgreSQL, JWT authentication, AWS S3, and AWS Lambda with a Next.js application; designed database schemas and 20+ migrations supporting users, organizations, assets, analytics, billing, and publishing.

Website Developer Intern, SleekCMS **Nov 2025 – Dec 2025**

- Built reusable EJS and Tailwind CSS templates for a dynamic website generation system, enabling non-technical users to create complete websites through structured inputs and data-driven layouts.

Projects

MailBot: AI-Powered Email Intelligence Platform Live — GitHub

- Integrated Gmail OAuth and Google Cloud Pub/Sub for inbox synchronization, with Groq LLMs assisting in email draft generation.
- Designed a 20-table PostgreSQL schema with embeddings and pgvector-based semantic retrieval for RAG-powered responses.

Tech: Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Google OAuth, Google Cloud Pub/Sub, Groq, pgvector

Vyzora: Developer-Focused Analytics Engine Live — GitHub

- Built a zero-dependency TypeScript SDK (2.7 KB gzipped) for event, pageview, and session tracking across single-page applications.
- Developed a queue-based backend with 15+ REST endpoints using Redis and BullMQ for asynchronous event processing and horizontal scaling.

Tech: TypeScript, Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ, Docker, Nginx

Education

Baderia Global Institute of Engineering and Management Jabalpur, India
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.10/10.0 Aug 2022 – Aug 2026

Honors & Leadership

- AI in Healthcare Hackathon Winner - Secured first place among 120+ teams.
- SIH 2024 Finalist - Selected among the top 5 finalists for Drug Inventory and Supply Chain Management System.
- HackOrbit 2025 - Achieved 8th place among 600+ participating teams.
- Google Student Ambassador - Conducted Gemini AI workshops for 100+ students (Dec 2024 – Dec 2025).
- Vice Chair, IEEE Student Branch - Managed event planning, budget allocation, and student engagement (Feb 2023 – Feb 2025).
